

THE JAMESON OPERATIONS DEVELOPMENT PROGRAM

- Are you interested in future expansion of your dental business?
- Looking to hire an associate?
- Looking to add locations?
- Do you want to focus on specific procedures?
- Do you have a goal to increase your footprint in the dental market?
- Do you need to find balance and more time outside of the practice(s)?

Through Jameson's Operational Development Program you can increase the efficiency of your practices through implementation of strategic leadership and more efficient and effective operating systems. Ultimately, you can see these types of goals and more become a reality in your dental business!

Who is this for?

1. Owners interested in future expansion by adding associates and/or locations.
2. Owners of multi-locations looking to systemize growth and reduce stress through:
 - a. Improved organization.
 - b. Operational systems.
 - c. Strategic planning.

How does it work?

Your program can be customized for you, your business needs and goals, and how you prefer to learn:

- Operating system development programs
- Train the trainer programs
- Strategic leadership development programs
- Customized with you and for you for optimal results.

Where do you begin?

Start with Jameson Operations Development Vision Days. During this time, your advisor will come to you, work on site and develop your vision and strategy to move forward. You will also receive a detailed assessment of current structure, risks and opportunities that will play into your growth strategy. From there you can create a strategy together to move forward with more operations development coaching.

Schedule a complimentary Jameson Discovery Session with the Jameson team to determine when and how we move forward with you. Your practice is unique. Let's take the time to uncover the best way forward to help you grow.

The Jameson Operations Development Program.
